

# Product Operation Guide

Please read it carefully before using the television and keep it properly, thank you!

(For the reference of television in 55 inch , 65inch , 70 inch and 75 inch only)

# Declaration

Welcome to use the interactive flat-panel TV (hereinafter referred to as “AIO”).

Please read all the materials distributed with the TV carefully before installing and using the product for the first time, which can help you use the product better. If you didn't operate the product according to the descriptions and requirements in the instruction, or operated the product incorrectly for the reasons of wrong understandings, our Company would not responsible for the loss caused by it.

Our Company has collated and checked the Product Operation Guide of the product carefully and strictly, but we cannot ensure that there is no mistake or oversight in the Instruction. The pictures in the Product Operation Guide are for reference only, and the real display of product shall prevail if there were several pictures uncomformable with real displays. For a better service, our Company keeps the right to improve and modify the product and software described in the Product Operation Guide and the content of the Product Operation Guide at any time without notice.

Our Company is not responsible for the data materials losing and loss caused by the incorrect operation of software and hardware, product repairing and other conditions, and not responsible for other indirect loss, neither. Please backup your data materials all time.

The content of the Product Operation Guide is protected by the copyright law, you cannot copy or transcribe the Product Operation Guide in any means, or transport the Product Operation Guide in any wired or wireless network in any means, or translate the Product Operation Guide in any language.

## Matters Needing Attention and Safety Warning

**Attention: Please read the instruction carefully and put it in a convenient position. Please obey the following installation and operating attentions.**

1. The safety and operation description should be read carefully before operating and using the product. Please keep the instruction for the future using.
2. All the warning signs in the Product Operation Guide should be followed.
3. The keys on the panel and remote control is unipolar switch, and press this key to switch it between the opening and standby mode in the condition of powering on; the "O" on the AIO background is entire-polar switch, press the "O" on the background to turn off the power, and press "T" to turn on the power. Entire-polar switch: a manual mechanical switch that can break all the polar of network source except for protective earth conductor. The distance of every polar of entire-polar switch should be no less than 3mm, the symbol "O" can only be used in the "breaking" sign of entire-polar switch. (Note: If the AIO was without entire-polar switch, the power plug to connect the AIO would be used as power breaking device, and the power plug should be easy to inserting and extracting).
4. Please turn off the power and extract the plug when there is abnormal sound of smell in the TV, do not use it when it is confirmed to be abnormal, and call the product servicemen to maintain it.
5. If the AIO is not used for a long time, please turn off the power and extract the plug, the connection between the TV and antenna should be cut off in thunderstorm season.
6. Please do not watch TV on thunderstorm day, and unplug the power plug and antenna before the thunderstorm comes to prevent the thunderstrike.
7. Flammables and explosive like candle, electric furnace and bulb cannot be put on the TV or close to it, which can avoid the accident on the TV.
8. Prevent the liquid and metal entering in the AIO, do not use it when there is liquid or metal entering in the AIO, and call the professionals to solve it timely.
9. Do not use the chemical reagent to wipe the AIO, which may make the shell spoil or damage the painted surface. Wipe it with the dried stupe ten minutes later from turning off the AIO when there is dust or dirt on it. The display screen can be wiped by clean mull. Unplug the AIO plug from the wall mounted power outlet before the cleaning. Do not use the liquid detergent or spray detergent.
10. Look out water and humidity. Do not use the product in where there is water or is close to water. Such as: bathroom, washstand, kitchen, water channel, washtub, and places nearby the humid basement or swimming pool, etc.
11. The TV shouldn't be suffered from water drop or water spatter, and the materials like vases which are full of water cannot be put on the TV.
12. The plug should be easy to insert, extract and is earth-connected. The product can be equipped with a polarized multi-finger AC plug (the plug has two multi-fingers in different width, and the plug can be inserted

in the power outlet in one direction, which is another safety feature of the plug). Try it in another direction if you cannot insert the plug into the outlet. Connect the electrician to change the outlet if you still cannot insert it in, please do not damage the safety features of the polarize plug. Additional warning: the product is equipped with a three-wire earth connection plug which possesses an earth connection pin, and can only inset in the earth-connected power outlet.

13. Do not put the product on the unstable trolley, frame, bracket or desk, and otherwise it may make the AIO turnover. Move it carefully when putting the product on the trolley. Sudden stop in a high speed, too much strength or rough surface may cause the turnover of trolley and the AIO.
14. The channel and hole on the equipment is for ventilating, which can ensure the product operate reliably and prevent the overheating. Do not cover papers, tablecloth or curtains on the ventilating hole which may disturb the ventilating. Ensure there is space around the product for the adequate ventilating.
15. The product can be supplied with power type and power voltage specified on the label. Please contact the product agency or local power supply company if you not sure the power type and voltage of your family.
16. The power cable in the accessories of product is CCC-ALL (with earth protection), ensure the earth terminal of the wall outlet is well when installing it. The power wiring shouldn't occupy the access to avoid treading, and should keep away from the place may make it pressed by other materials.
17. Do not put any type sundries in the product through any hole, and otherwise they may touch the dangerous voltage point or extruding part, and cause the fire or thunderstrike.
18. Do not repair the product arbitrarily. Open or take apart the cover arbitrarily may make you face dangerous voltage or other risks. Please contact the servicemen to solve it if there is any maintenance matter.
19. Follow the operation instructions provided by the manufacturer when installing the product, and use the installation fittings commanded by the manufacturer.
20. The wall installation (if there was) of the product is only applied to normal concrete wall, solid wall and wooden wall which can bear the 3 times weight of the TV, for the hanging and lifting on special walls (means the steel structure wall, hollow structure wall and walls in glass and marble materials, etc.), the manufacturer suggest you to consider the safety of hanging or lifting, and operate it after ensuring there is no error. Installation on those types of special materials should be finished by the professionals, and the manufacturer has no duty on this type of installation.
21. The back nameplate with plain mains that: if the important safe components (components on the circuit board with this symbol on the side) needed to be changed during the repairing, the components specified in the safety test files can be used only, and the it can be gained from the manufacturer if there is no same component.
22. The protective earthing of output outlet and touchable electric conduction components of type I TV should be connected reliably with the protective earthing terminal of TV.

# Product Overview

## Product Features

Make the functions interactive flat-panel TV and computer to an all-in-one body, use the infrared and multi-touch technology, and provide multi sizes and configuration specifications. The touching skin can replace the mouse to operate the clicking and slipping functions on the interface flexibly, which is convenient and efficient. It is applied in advertisement and education industries.

### ▲ Innovation: Excellent appearance

The AIO looks elegant and generous, in an appearance design of super light, ultrathin and ultra narrow, which is simple and stylish. Aluminum alloy and surface treatment technology of matte sandblasting is adopted in the front rail, which is in a superior metallic; preposition key, preposition loudspeaker and preposition multi-function port.

### ▲ Vivid: Transcendence display

FULLHDLED high-definition LCD panel is adopted in the AIO. The resolution ratio reaches 1920×1080, displayed color shows the original scene, the scenes are gentle, the display is uniform, no flicker and in a high corresponding speed, the distinct scene can be seen from different directions.

### ▲ Efficient: Accurate control

Infrared touch is adopted in the AIO to achieve the six-point touch function, the touch is in a high accuracy and high sensitivity, the users can take a single-point touch by hand and without pen writing, and also can use different gestures like click, double-click, translation, rolling and rotation to touch the screen and control it follow your way, which can replace the mouse to finish the operation easily, and has the technical features of fast response, high position accuracy, strong environmental adaption and accurate operation.

### ▲ High-quality: Interaction platform

The core functions are the AIO is displayed by a big screen intensively, the touch operation is convenient, screen writing label is visual, the large image can be handle in a high speed, the remote data sharing, and operation mode is humanized, which provide the users a epochal communication assisting platform. It can be widely used in diversity places like education, training room, conference room, exhibition, and demonstration hall.

# Product Overview

## Product Features

### ▲ Convenient: Diversified functions

The AIO provides the users with diversified functional interfaces, and provide the diversified internal-extension interfaces that can achieve the integration extension of the internal functional module, and make the information processing capability stronger; it support the browsing and management of various files including OFFICE; the keyboard is replaced by the remote control, the F1--F12 key functions are achieved, and has the function to remotely control the TV switch; the function of shortcut touch menu on the mainboard can be callout quickly by touching the screen.

### ▲ Standby system: Android4.2

The AIO supports the Android4.2 system, which can finish the operation of playing and editing functions without using the computer, and it can provide the third-part tool software with abundant internally installed software.

Note: The standby system is limited:  
Type 55inch-75inch with Android system

# Product Overview

## Control Port and Key Description

-  HDMI: External device information can be input by HDMI to achieve the dual display of local and external display.
-  USB3.0/ USB2.0/ TV-USB: used to connect with external storage device, like: USB keyboard, UHD and mobile HD.
-  TOUCH: can be used to connect external device with the local to achieve the touch.
-  EARPHONE: can be used to connect the earphone and sound device.
-  YpbPr IN: can be used to connect external device with video interface, like: STP, DVD, etc. A
-  V IN1/ 2: can be used to connect external device with video interface, like: STP, DVD, etc. A
-  V OUT: can use the TV the monitoring signal output as a signal resource.
-  Coaxial: can be used to connect the sound device.
-  RS232: can be used to external device by using RS232 port.
-  VGA IN: can be used to connect the computer host
-  VGA OUT: can output local signal by VGA to dual display of local and external display. AUDIO
-  N IN: connect with the audio output port of the computer.
-  LAN: use to connect the WAN or LAN.
-  SD CARD: use to extend the TV storage space.
-  RF IN: the radio frequency input which can be used to connect the cable TV.

### 2. Basic operation

#### Switch on

1) Use alternating current power supply of 100~240V to insert in the TV outlet and open switch on the power.

2) Use the power key on remote control or AIO to switch it on.

#### Switch off.

1) Press the power key on the remote control or TV when switching off.

2) The power should be off and then the outlet should be pull off when switching off the local power completely

#### Saving before switching off

The AIO may save the scene and voice setting when switching off. It will in the condition before switching off when switching it on the next time

# Product Installing and Adjusting

## Connect the AIO with External Computer

### 1. Minimum configuration requirement of external computer

- Processor with 2.1 GHZ is commanded to use the computer or laptop upper to Intel Core 2 Duo
- DDR1 storage more than 1G is commanded to use the storage more than 2G DDR2
- Graphic display card more than 32 colors.
- Hard disk more than 500M
- USB port, VGA port and HDMI port
- Windows Xp/Vista/Windows7/Windows8

### 2. Installing and connecting

- 1) Use the attached power wire to connect the AIO to AC 100~240V.
- 2) Connect the audio/video information input of the computer, use the VGA wire and audio wire or HDMI to connect the AIO and computer.

Picture 6: Connect the AIO with Compute

# Product Installing and Adjusting

## Connect the AIO with External Computer

### 3) Connect the touch control wire

Connection method of USB wire: connect the port A of the USB wire with the computer. Connect the port A of the USB wire with USB touch port of AIO.

Picture 7.USB connection mode

4) Open the AIO, the screen scene displays. Use the remote control or 'INPUT' key to callout the "signal resource" menu (see in Picture 9 and Picture 11), or callout the "shortcut menu" by upper touching the screen for over 4CM from the middle of the bottom (see in Picture 10). Set the signal source the AIO need, and the computer scene will display on the local, the AIO can be operated and controlled by the touch control function, and the signal transmission between the computer and AIO can be achieved.

# Product Installing and Adjusting

## Connect the AIO with Internal Computer

### Particular notice

The users with internal computer only refer the operation part, the practical internal computer configuration depends on the matter.

### 2. OPS configuration of pluggable internal computer

- CPU: Intel I3/I5/I7
- Chipset: Intel Chipset
- Internal storage: 2G/4G DDR3; The maximum support of mainboard 8G DDR3
- Hard disk: 2.5 inch 320G/500G
- Display card: Integrated high-performance display card
- Display resolution: 1920\*1080
- Operating system: Windows 7
- Port: 1 way of USB3.0, 3 ways of USB2.0, 1 way of RJ45 network interface, 1 way of HDMI output, 1 way of audio output and 1 way of audio input

### 2. Installing and connecting

- 1) Use the attached power wire to connect the AIO to AC100~240V.
- 2) The audio, video and touch control wire are connected in the internal computer, and do not need to be connected externally again.

Picture 8. The AIO is connected with the internal computer

# Product Installing and Adjusting

## Connect the AIO with Internal Computer

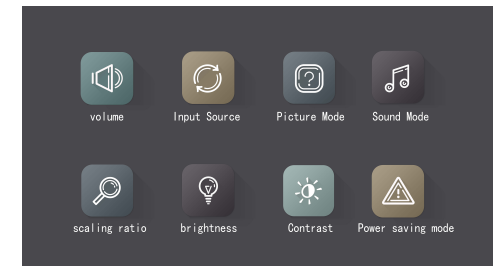

3) Open the AIO, the screen scene displays. Use the remote control or "INPUT" key to call out the "signal resource" menu (see in Picture 9 and Picture 11), or call out the "shortcut menu" by upper touching the screen for over 4CM from the middle of the bottom (see in Picture 10). Set the signal source the AIO need, and the computer scene will display on the local, the AIO can be operated and controlled by the touch control function, and the signal transmission between the computer and AIO can be achieved.

Note: The function of picture 9 and picture 10 is limited: Type 55inch- 75inch without Android system

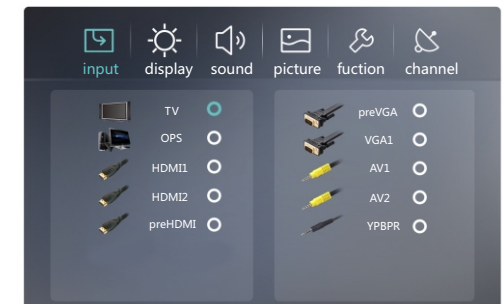

The function of picture 11 is limited: Type 55inch- 75inch with Android system

User-definition: The user can define the shortcut key

Note: Enter the task management-setting interface, and the background program is displayed in lines. Upper touch one of the program to delete it from the task list.

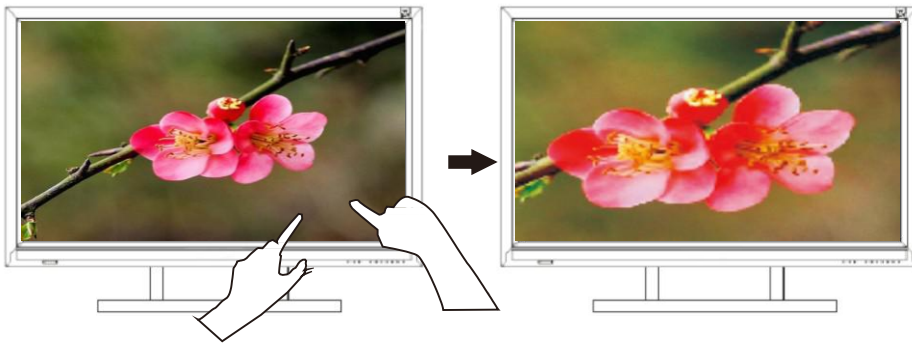

# Using of Product Function

## Using of Computer Interaction Function

### Interaction function of internal computer

Use the IOA computer interaction function, can transform the signal input in the signal resource connected by internal computer or internal computer by connecting with the external computer (wired connectin), which can achieve the touch operation of various of application functions, and transmit to the internal or internal computer in real time; can also transmit to the AIO by the operation of internal computer and internal computer.

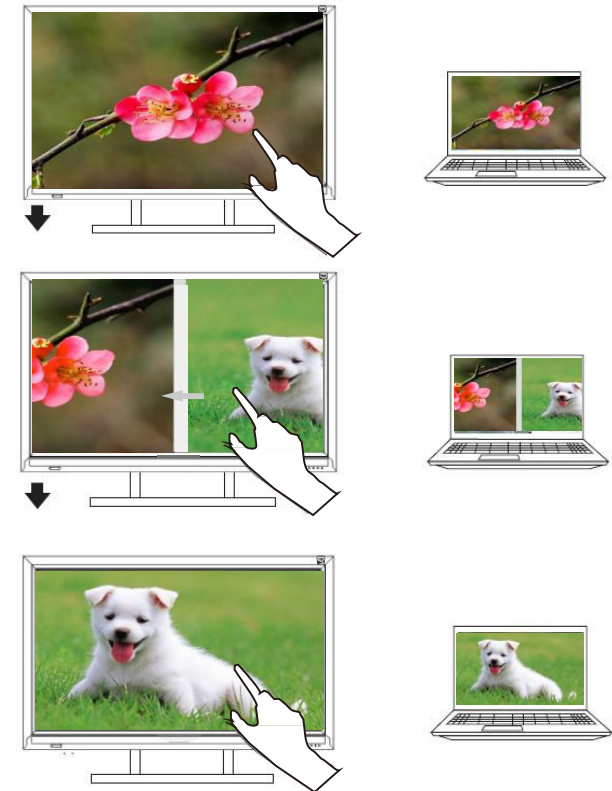

Picture 37. Interaction function of internal computer

According to the instructions in “Product Installing and Adjusting Method”, set the input signal of the local into “internal computer” after connecting the AIO with the internal computer, and then can operate the interaction function of the functions of computer by touching the screen of the AIO.

# Using of Product Function

## Using of Computer Interaction Function

### Extraction function of internal computer

Picture 38. Interaction function of external computer

According to the instructions in “Product Installing and Adjusting Method”, set the input signal of the local into “internal computer” after connecting the AIO with the external computer, and then can operate the interaction function of the functions of computer by touching the screen of the AIO.

# Elimination Method of Simple

## AIO System Fault

### Special Notes:

Please check the tables below to find the cause of the fault you facing before the repairing. Please contact the Product Service Center to repair it when you ensure you have operated it according to the Operation Guide, and cannot clear the fault,

AIO System Fault		
Phenomenon	Solution	
No scene and voice	1) Check whether the power line is inserted in the outlet on the wall.	
	2) Check whether the signal wire is connected correctly.	
	3) Check whether the power of the external device is opened.	
	4) Check whether the product is in the standby status.	
Normal scene without voice	1) Check whether set the voice in maximum.	
	2) Check whether se the voice into sound-off.	
	3) Check whether the external audio cable is connected correctly.	
No scene or the scene is black and white	1) Check and adjust the color setting.	
	2) Check and adjust the color system.	
The voice and scene are disturbed	1) Find the electrical disturbing the AIO, and keep it away from the AIO.	
	2) Insert the power plug of the AIO in another outlet.	
The scene is dim or snow, image fault	1) Check whether the signal wire connection is loose.	
	2) Reset and slightly adjust the signal input.	
The remote control is out of control	1) Check whether the battery of the remote control is installed correctly.	
	2) Check whether the battery of the remote control is used up, and change it timely.	
	3) Check whether the positive and negative electrode of the battery of the remote control battery is installed in the right direction.	
	4) Check whether there is a matter covering the signal emission window of the remote control.	
Touch System Fault		
Phenomenon	Causes	Solution
The touch screen drifting suddenly, which means the mouse pointer is not in the finger-touched position.	When there is a touch operation on the mouse pointer, please check whether touching the screen with cloth or other matters, which may make the mouse pointer not in the finger-touched position.	Ensure there is no other matter touching the screen in the touch operation at the same time.
There is no reaction when touching	One of the following conditions may cause the phenomenon	1) Contact the computers servicer 2) Contact the After-sell Product Repairing Center
	1) A break down in touch signal wire (USB wire) 2) A break down in computer operation system 3) A break down in computer host port (USB)

	Power resource	AC100~240V wide input voltage			
Displayed parameter	Type	55 inch/LED	65 inch/LED	70 inch/LED	75 inch/LED
	Size	1209.6mm*680.4mm	1428.48mm*803.52mm	1538.880mm*865.620mm	1650.24mm*928.26mm
	Visual angle and image resolution	178° 1920(H)*1080(V)(Full hd)			
TV parameter	Brightness and displayed color	330cd/M2 10bit	360cd/M2 10bit 1.07B	350cd/M2 10bit	420cd/M2 10bit 1.07B
	Image system and voice system	PAL/NTSC,BG/DK/MN		NTSC(3.58MHz)PAL, PAL060,SECAM	PAL,DK
	Decode	3D digital comb filter, 3D image motorial sound deduction, 3D motorial adaptive comb filter			
	Loudspeaker type and power	Internal loudspeaker 8 Ohm/10W*2			
	Input port	(1) AV port: 2 groups ( a group of three-in-one port); RF port: 1 group; VGA port: 2 groups (preposition 1 group); audio port: 2 groups (preposition 1 group); Video composante: 1group; TOUCH PORT: 2groups (preposition 1 group); HDMI port: 4 group (preposition 1 group); USB2.0 port: 2group (preposition 1 group); USB3.0 port: 1 group (preposition 1 group is only used in PC) (2)VGA 2group (preposition 1 group); HDMI 4group (preposition 1 group); AV port:2 group (1 group three-in-one port); Video composante 1group (three-in-one port); USB2.0 3group (preposition 1 group); USB3.0 2group (preposition 1 group); audio 2group (preposition 1 group); RS232 1group; TOUCH 2group (preposition 1 group);			
Touch and control parameter	Output port	Coaxial output 1group; Earphone 1group; AV 1group(three-in-one port); VGA 1group; Audio 1group;			
	Insertion and reaction mode	Internal all-in-one type			
	Writing mode and position accuracy	Finger, touch pen or other non-transparent matters whose diameters are more than 5mm; the position accuracy is ±2mm			
Choosable component parameter	Resolution ratio	32767*32767			
	Multi-point touch module group	Camera module group	Computer module group	★ Multichannel VGA module group	
Touch mode: Infrared induction touch Touch count:4,6,10	Camera:300W, 500W	CPU: Intel I3, I5, I7 Internal storage:2G/4G DDR3 Hard disk:320G/500G Display card: Intel integrated high-capacity display card	Input port: VGA of two channels, audio of two groups, Output port: VGA of one channel		

## Accessories Included and Environmental Protection Description

### Accessories list

No.	Name	Amount	Specification
1	Operation guide	1	
2	Remote control	1	
3	Power wire	1	1.5m
4	Touch USB wire	1	1.5m
5	VGA wire	1	1.5m
6	Audio wire	1	1.5m
7	Certificate	1	
8	Guarantee card	1	

The name and content of poisonous and harmful substance or elementary in the product

Component name	Poisonous and harmful substance or elementary					
	Lead (Pb)	Mercury (Hg)	Nickel (Cd)	hexavalent chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ether (PBDE)
Plastic	O	O	O	O	X	X
LCD screen/POP screen	X	X	O	O	O	O
circuit board component	X	O	O	O	O	O
Hardware structure/decoration	X	O	O	O	O	O
Loudspeaker component	X	O	O	O	O	O
Remote control	X	O	O	O	O	O
Power wire	X	O	O	O	O	O

O: Means the content of the poisonous and harmful substance in the uniform material of the accessories is less than the limit requirement of SJ/T11363-2006

X: Means the content of the poisonous and harmful substance in more than one uniform material of the accessories is more than the limit requirement of SJ/T11363-2006.

Technical note: The hardware structure, injection molding, connector and majority of the electrical parts are complied with the requirements of Chinese and EU's RoHS directive, only few parts are not realized the poisonous and harmful substance or elementary replacement for fear of losing the product reliability, which is limited by the global technical limitation. You can feel free to use it, and it does no harm to the users in the correct using condition.

The label is the Environmental Protection Use Period label, period (ten years) the poisonous and harmful substance or elementary in electric product will not leak or mutate in the normal using condition, or users use the electric product will not pollute the environment strictly or damage human body or property seriously.

## After-sales Commitment

### Guarantee

#### 1. Guarantee period of the AIO and its accessories

1.1 Guarantee service of touch and control AIO: the screen is guaranteed for one year, other accessories are guaranteed for three years

1.2 Screen part: screen, backlight component, path component and overflow plate component

1.3 Other accessories include the following part:

1.3.1 TV part: TV mainboard, TV power panel, power panel, pinboard, keyboard plate, and remote signal receiver;

1.3.2 Computer part: computer mainboard, CPU, internal storage, hard disk, and power source;

1.3.3 Touch part: touch frame, glass;

1.3.4 Affix part: remote control, power wire, VGA wire, USB wire and audio power;

1.3.5 Part faults of internal computer operation system and software are not in the guarantee range.

#### 2. Installing and adjusting policy

2.1 Our Company does not provide the on-site installing and adjusting service for the customer of touch and control AIO. We will take on-site installing and adjusting fee if the customer request for the on-site service.

2.2 The special services for the product bought by the customer (special walls whose mounting surfaces are glass, marble, tile and hollow wall and special installing methods like ceiling hoisting and hoisting) need a further consult.

#### 3. Calculation of guarantee period

3.1 According to the relevant laws and regulations, the calculation method of guarantee period of our Company is as follows: the guarantee period in from the delivery, installing and adjusting between seller and customer ending, and for those do not need delivery, installing and adjusting is calculated from the date out from the factory.

#### 4. Guarantee service period and condition

4.1 Guarantee service period: change within one month and repairing within three years.

4.2 Guarantee service condition:

Conditions of guarantee service: the product used and maintained normally during the guarantee period. The fault caused by the component of the product can repair or change the component for free after confirmed by the technician. In the warranty period, when the component fault of product is checked and confirmed by the technician cannot be repaired on site (like: screen body fault) and need to be returned to the factory, the customer should bear the transportation fee.
